Report to the Community

Informe a la Comunidad

La Junta de Salud Mental del Condado de Lorain es la agencia pública local que planea, financia, monitorea y evalúa un sistema de servicios para residentes con enfermedades mentales en el condado de Lorain.

Este es nuestro Informe a la Comunidad del 2017.

The Lorain County Board of Mental Health plans, funds, and monitors a system of quality public mental health services that enhance the health and well-being of the people of Lorain County.

A citizen Board of 18 community members determines which services are to be provided and funded based upon state requirements and community needs. Board members also monitor funding and evaluation of publicly funded services. Private, not-for-profit, and independent community agencies are contracted by the Lorain County Board of Mental Health to provide an array of mental health services. Services include counseling, psychiatry, prevention, consultation, peer-to-peer support, community support, crisis intervention, housing and vocational support.

Community

“When people become mentally healthier, and when people overcome their difficulties in life, they become more productive. They do business. They do art. They do sports. They do everything. And that’s what makes a community.”

—Mental Health Crisis Intervention Clinician from the Lorain County mental health network

What makes a community? Without question, it’s the people. The Lorain County mental health network is devoted to helping all people in local homes and neighborhoods live their best possible future.

We are fortunate that alongside the clinical staff who help people recover from mental illnesses, we have strong partnerships within schools, with law enforcement and other first responders, and with local leaders who understand how mental health touches every sector of our community.

Thank you for your ongoing support. The work of the Lorain County Board of Mental Health primarily is supported by local funding through the mental health levy.

Yours Sincerely,

Timothy Carrion

*Lorain County Board of Mental Health
Board Chair*

Highlights on our

In 2017, the Lorain County Board of Mental Health (LCBMH) supported our community through treatment, prevention, and crisis services.

We serve families.

The agencies in our mental health network served thousands of people last year. 23% of those served were kids.

We help schools.

We are present in every Lorain County school district, serving 1,800 students last year. We have expanded services in schools to meet an ever-growing need, and improved crisis services for children and teens.

We train first responders.

We train law enforcement officers and first responders in crisis intervention, including trauma-informed policing training last year for 183 officers. That's in addition to continuing to conduct Crisis Intervention Team (CIT) training to help law enforcement officers successfully interact with someone experiencing a mental health crisis. We've trained 235 officers over the last 16 years. From 2013-2017, we provided Advanced CIT training to 80 of those officers. Plus, we co-chair the local Stepping Up Initiative with the Sheriff's Office to address mental illness in the jails.

We educate in the community.

We provide hundreds of hours of trainings like Mental Health First Aid or suicide prevention classes to community members and professionals.

We are there in a crisis.

Our mental health crisis hotline receives approximately 14,000 calls per year. Also, we are increasing efforts and collaborations to improve the interconnected network of crisis services, from crisis hotline calls to hospital and community-based care, to connection with local law enforcement.

En el 2017, la Junta de Salud Mental del Condado de Lorain apoyó a nuestra comunidad a través de servicios de tratamiento, prevención y crisis.

Servimos a las familias.

Ayudamos a las escuelas.

Entrenamos primeros respondedores.

Educamos en la comunidad.

Estamos allí en una crisis.

collaborations

In beautiful, visual examples of working together, **Gathering Hope House** members created two works of collaborative art, "Mona Lisa" and "Maya Angelou." Participants used the grid method. The full image is created one square at a time, person by person, to create a complete picture.
