Subject: Program Expansion - Prevention and Mentoring				
Contract Entity(s): Big Brothers Big Sisters of Lorain County (BBBSLC)				
Contra	ct Term: FY26			
Funding Source(s): Ohio Department of Behavioral Health (DBH, formerly OMHAS)				
Contract Amount: Increase \$129,237				

**Project Description:** Previously funded through the US Department of Education's 21<sup>st</sup> Century Learning Grant, Big Brothers Big Sisters has been informed that these funds are not available as the new fiscal year begins and that it is projected that when funds are released, they will receive a \$200,000 reduction in their award which will likely not be renewed next year.

The attached request, job description and budget, propose that a portion of their existing work become a part of their MHARS contract, focused on augmenting prevention capacity within our network and outlined in our strategic planning. This request developed out of discussions specific to the existing work and where it aligned with our behavioral health network needs and strategic plan. The resulting proposal was to bring the two described Full Time Equivalents (FTEs) into the MHARS/BBBS contract and continue to refine the job descriptions for alignment.

Planning considerations or impact specific to population, cultural or geographic disparities for access and engagement: Access to evidence-based prevention program is limited by qualified providers, and those providers having a relationship with entities serving youth. Providers holding the Ohio Certified Prevention Specialist credentials are difficult to find, and with changes in the state requirements specific to prevention, they are required to supervise the work of others. Development of this position to include coalition leadership and shared supervision for our network providers is a gap in our current continuum of care.

Having an existing relationship with Elyria High School, Clearview High School, LC Joint Vocational School and Westwood Middle School brings a turnkey infrastructure for continuation of prevention supports and mentoring. This position will be developed to focus more predominantly on behavioral health programming.

#### Planning considerations or impact specific to the Strategic Plan:

Alignment of these two FTE's with our Mission and Vision, adds capacity and specialization to Focus and Strengthen Behavioral Healthcare (Goal 1) through the provision of training and prevention services.

**Related Facts:** Big Brothers Big Sisters is already a contracted MHARS network provider of mentoring services. Excerpted from their application: "The program has shown measurable results in several prevention metrics including increased attendance, school connectedness and improved proficiency in English and math. As a result, BBBSLC has won two BBBS of America national awards in the past three years including the National Quality Award and the National Growth Award."

**Number Served:** One FTE is a new position. Existing Match Support Specialist historically has supported 70 mentees and their matches.

Subject: Transitional Living Center (TLC)				
Contract Entity(s): Ravenwood Health				
Contract Term: FY26				
Funding Source(s): Ohio Department of Behavioral Health (DBH, formerly OMHAS)				
Contract Amount: \$7,268				

#### **Project Description:**

The Transitional Living Center (TLC) at Ravenwood offers a unique level of care. In the words of the agency: "The program offers a 24/7 supervised living environment with services that include counseling, medication management, case management, peer support and also linkage to community support. The TLC also provides linkage to clinical services, resource navigation assistance and on-site support services as residents move through three program levels to restore or enhance the living skills needed to maintain long-term independence in their community."

As a step down from the hospital, this is not only better care through transitional and treatment services provided in the least restrictive setting but is also a savings of funding as compared to a hospital bed day rate.

# Planning considerations or impact specific to population, cultural or geographic disparities for access and engagement:

This level of care enhances our network of providers by expanding capacity to serve Lorain County residents in their behavioral health treatment. By supporting the per diem of this level of care, those who would otherwise not be able to access this level of care are able to receive the services.

#### Planning considerations or impact specific to the Strategic Plan:

Adds another level of care access point to our network.

#### Related Facts:

Previously, these beds were funded through the NEO Collaborative with Cuyahoga County as fiscal agent. Under the NEO Collaborative dollars, payment was at an all-inclusive rate of \$357.50. We are proposing to support the \$150 bed day rate and then utilize the MHARS Board as payor of last resort, following insurance, for any behavioral health treatment and wrap around services.

#### **Project Description:**

This project assists drug courts and other specialized dockets with funding to effectively manage addicted offenders in the community.

In response to Ohio's opioid epidemic, OhioMHAS created the Specialized Dockets Subsidy Project. This project assists drug courts and other specialized dockets with funding to effectively manage addicted offenders in the community. As a result, fewer people are committed to the state prison system. Specialized dockets that target addicted parents charged with abuse, neglect or dependency of their minor children were also eligible for funding. These programs reduce the number of children who are permanently removed from their homes and, instead, increase the number of children who can remain in their homes with protective supervision provided by child protective services agencies.

Planning considerations or impact specific to population, cultural or geographic disparities for access and engagement: Funding allows specialty dockets to serve the community. Participants on the specialty docket would otherwise not have access to this opportunity of wrap around, intensive support during their recovery.

**Related Facts:** Funding used for partial salary for court administrators as well as wrap around recovery supports for court participants.

#### **Project Description:**

The Projects for Assistance in Transition from Homelessness (PATH) program offers services for people with serious mental illness (SMI) and co-occurring substance use disorders, who are experiencing homelessness or are at risk of becoming homeless. PATH services include community-based outreach, mental health, substance abuse, case management and other support services, as well as a limited set of housing services. This previously SOS 4.0 project, now funded through levy, provides PATH services for those with substance use disorders only and funding added for housing supports.

Planning considerations or impact specific to population, cultural or geographic disparities for access and engagement:

Serves the homeless population in Lorain County.

#### Planning considerations or impact specific to the Strategic Plan:

These dollars allow the uninsured and underinsured to access treatment services.

**Related Facts:** 

This increase is for services already provided in FY25.

#### **Number Served:**

#### **Project Description:**

Lorain UMADAOP Gambling Prevention Services includes approaches for youth and adult populations. It will be the only adult board-funded gambling prevention program to include a universal prevention program, Stacked Deck for youth and young adults, and SMART Bet for adults aged 18-24, as well as an indicated prevention program GEAR (Gambling Evaluation and Reduction) for adults. Stacked Deck is an evidence-based curriculum for the prevention of problem gambling among teens and young adults. They are proven to be effective in changing gambling behavior in youth as well as reducing their risk of developing gambling-related problems. SMART Bet promotes responsible gambling by offering online information, resources, support, and guidance to young people, adults, and communities. SMART Bet is a training program for the 18 to 24-year-old population that helps promote responsible gambling, identify problem gambling, and offers participants information, resources, support, and guidance. GEAR is a confidential, educational, phone-based program to help participants steer away from potentially harmful gambling patterns without going to a treatment center. GEAR combines phone consultations with certified counselors, workbook exercises, and referral resources to give participants the tools and motivation to make good choices about gambling.

# Planning considerations or impact specific to population, cultural or geographic disparities for access and engagement:

The mission of the Lorain Urban Minority Alcoholism and Drug Abuse Outreach Program (UMADAOP) is to ensure that alcohol and other drug services are available, accessible and affordable to the African and Hispanic American population of Lorain County; and, +q ensure that these services are rendered in a manner

that are reflective and responsive to the cultural essence of the African and Hispanic American population of Lorain County.

#### Planning considerations or impact specific to the Strategic Plan:

Plan communications and outreach strategy to make prevention and education programs accessible to all in county.

#### Related Facts:

This funding is adjusting the FY25 budget to utilize grant dollars unallocated for gambling treatment and prevention services.

#### **Number Served:**

55 youth served in their gambling prevention program

#### **System Impact:**

Expanded gambling services to reach identified at risk populations not previously targeted and trauma in formed supports for underserved families and identified youth at risk for truancy, suicide and substance misuse.

#### Michael,

I am writing to address the proposal for installing a second monument sign in front of the Crisis Recovery Center.

After careful consideration, I would like to discuss several of our concerns regarding the installation of an additional sign:

**Safety Concerns:** Traffic on Broadway travels at speeds between 35-50 MPH. Introducing a second sign could impair visibility and distract drivers, potentially leading to safety hazards.

**Cost Implications:** The installation and maintenance of a second monument sign would incur significant costs. Given our current budget constraints, we believe these funds could be better allocated to other critical areas within the CRC facility.

**Impaired Visibility:** The presence of two signs could lead to visual clutter, making it difficult for drivers to read either sign effectively. This could diminish the impact of our messaging.

**Original Scope:** To my recollection the installation of a second sign was not included in the original project scope. Our existing large monument LED sign in front of Riveon is capable of carrying the messaging for both facilities effectively.

It is my understating that the MHARS board of directors has directed Hill International to explore monument sign solutions. According to the following section(s) of the lease agreement between our two organizations, executed November 2023 (attached to this email), 1.2.4; 4.2; and 7.2. Where section 7.6 specifically states, "Signs and Trademarks. Subject to Landlord's prior written approval thereof, Tenant shall have the right to erect or attach upon all parts of the Leased Premises all signs, sign faces, posters, banners, and trademark items as it may deem proper, subject to first obtaining any required approvals of the Governing Authorities, and subject to any matters of record. All On-Site Signage including any signs, sign faces, posters, banners, and trademark items (except for the sign structures themselves) shall be removed by Tenant at the expiration or termination of this Lease at Tenant's sole expense. Landlord shall reasonably cooperate with Tenant (at no cost or expense to Landlord) in obtaining any necessary permits or variances from governmental restrictions placed upon the use of signs.

That said, we believe that utilizing the existing LED sign will ensure clear and concise communication without compromising driver safety. We are open to discussing alternative solutions that meet the needs of both driver safety, messaging efficacy and awareness of services.

Please feel free to reach out if you have any questions or would like to discuss this further.

Don,

The Board asked me to get pricing to actually install the monument sign at this point. I am copying Michael on this so the two of you can discuss, if need be, to make sure everyone is on the same page before I move forward with this.

In reading the minutes I see there is a line that calls for a 20-amp circuit for a monument sign. Last I recall, a monument was not in the scope, only the conduit.

Is this still the case? I ask because there is a monument 50-100 feet away to the south.

Subject: LCCRC Exterior Signage

Attachments: LCCRC02\_062625.pdf; LorainCo.CrisisRecoveryCenter,Lorain, OH Proposal 72525.pdf

Michael,

Here is where I am at with exterior signage:

#### **Monument Signage**

Wagner has provided a price of \$49,600 for a 10mm pitch LED sign similar in style to the adjacent monument sign at Riveon. There would also be permitting costs billed on a cost reimbursable basis - estimating an additional \$3,000 for that. This would be an additional funding request that needs approval. Once we move forward, Wagner will need to get a permit for the sign that will need to go through City of Lorain Planning and Zoning so exact timing of that process depends on timing of their meetings after Wagner has the OK to proceed. If we want to move forward, we can map out a more accurate timeline for that process. Wagner does not put the sign into production until they receive a deposit of 60% of the price and permits are in place.

Electrical - I currently have a conduit run to the location Perspectus identified on their drawings with a single 277v lighting circuit included in their Contract. This sign requires 2 120v power circuits (one for each face). I will likely need two conduits to this location to accommodate. Fortunately, Panzica did run a spare conduit to a different location adjacent to Broadway that I may be able to intercept and reroute to save us from having to run another conduit all the way out from the building and under the fire department access road. I am estimating the Panzica will need a change order of approximately \$10K to rework the electrical and provide the revised / additional power for this signage.

#### Challenges / Risks

Grading - In order to get the occupancy permit for the building I need to get the site to final grade and stabilized (seeded) and approved by the City Engineering Department. This will occur very shortly. So, once I have approvals, the electrical and signage installs will likely disturb the area, and I will need to bring a landscaper back to fix it. I am estimating \$2500 to do that.

Location - The electrical I have already installed is to a certain location and the most cost-efficient way to get the electrical will be to get installed as quickly as possible while the electrician is still on site. If the sign moves either as we are internally finalizing discussions with Riveon or through the permitting process, there are cost implications to moving electrical. The least risk on the electrical side would be not to do anything else until we have a permit in hand, but it also could add electrical costs for the electrician to come back later. I can be more definitive about this once I understand the total schedule both from an approval and permitting standpoint.

#### Cost Summary

Sign (Wagner) - \$49,600
Sign Permitting Estimate (Wagner/City) - \$3,000
Electrical Estimate (Panzica) - \$10,000
Landscaping Rework (Panzica)- \$2,500
Total Estimated Cost \$65,100

Wall Mounted Signage on the East Side of Building

In the previously approved exterior signage from Takeform, there was \$6,901.76 including for the sign on the east side of the building. This includes permitting costs. This signage would be in the dimensional aluminum letters stood off from the building and match the signage being installed on the front of the building adjacent to the front door. At Dan's request to look at something lit I held the east side signage out of the package when we signed the agreement.

Wagner provided a proposal to do an internally lit sign for \$7,355 (plus permits). The challenge with this is the electrical. The interior of the building behind this sign is an emergency egress stairway which has very strict code requirements that prohibit any electrical being run through it other than what is required to provide lighting for the stairs. If I do run other electrical in this space, I have to isolate it with a rated fire wall enclosure which is going to be very expensive and not look very nice. It would also require me to make one or more penetrations through the masonry exterior skin of the building, which no matter how hard we work to seal could be source of potential leaking after the fact because just can't do the same techniques as if we made the penetrations when we did the original construction. So the only other way to get electrical to this sign would be to feed it from the roof or the ground which would require us to surface mount conduit or raceway to the wall to get the electrical there (as well as between each row of the sign) which no matter how carefully we try to paint it to match the brick will still likely stand out and look like an afterthought. So in summary I would not recommend this approach.

Perspectus believes that an unlit sign can be sufficiently lit via a ground mounted up light adjacent to the building. I am waiting for them to provide a specific fixture selection, but I would assume a budget price of \$5k to provide the light and run conduit and wire to it. As noted above - timing is going to be a challenge with this in regard to landscaping there will also likely be some related costs there for landscape repairs.

You will see in the attached Wagner quote that they also provided for \$3,020 (plus permits) for a simple surface mounted wall sign with white dimensional letters. I would recommend that we proceed with the already funded sign from Takeform for \$6,901.76 as it will match the other building signage and then proceed with ground lighting it via a change order from Panzica as Perspectus has proposed.

Note that given timelines at this point it will be unlikely that either of these signs will be in place and illuminated in time for the grand opening. I made Dan aware of this in regard to the building mounting signage when I met him on site and he asked me to pause moving forward with that. And the monument sign is a whole new project in itself.

Let me know if you concur with my recommendations, or want to pursue something different, and I can work on getting better pricing information from Panzica on the electrical portions and put a full formal recommendation package together for the Board approval.

Thanks,
